Creating a financial plan is where all of the business planning comes together. Up to this point, the target market, target customers, and pricing have all been identified. These items, along with assumptions, will help estimate the company's sales forecast. The other side of the business will be what expenses are expected. This is important on an ongoing basis to see when the business is profitable. It is also important to know what expenses will need to be funded before customer sales, or the cash they generate, is received.

At a minimum, this section should include estimated start-up costs and projected profit and loss, along with a summary of the assumptions being made with these projections. Assumptions should include initial and ongoing sales, along with the timing of these inflows.

17. FINANCIAL PLAN
